Certificate of Cloud Auditing Knowledge™(CCAK™)

Mercury Solutions Limited, in collaboration with ISACA and Cloud Security Alliance, provides the much-sought-after Certificate in Cloud Auditing Knowledge Course [CCAK]. This path-breaking certification is the first one to certify a professional's expertise in the principles of auditing cloud computing systems. CCAK is conducted on the basis of 9 modules.

Mercury Solutions trains you in the pioneering course for hybrid and cloud security auditing, Certificate of Cloud Auditing Knowledge Course. This certification's virtual training sessions equip you with the knowledge of cloud security assessment methods

Certificate of Cloud Auditing Knowledge or CCAK from Mercury Solutions Limited is one of the most reputed courses in the Cloud Security domain. Those coming into the course build on their foundational knowledge and skills of the digital cloud and gain a deeper understanding of cloud management, its operational, technical, and regulatory aspects. CCAK training enhances the knowledge and skillsets of a professional in their responsiveness in proactively safeguarding the confidentiality and integrity of their organization's cloud system in particular.

Professionals who attain the CCAK certificate are in demand worldwide for this accreditation by Mercury Solutions whose training is comprehensive, highly interactive, engaging, courtesy veteran trainers, renowned for pushing their limits to make a concept comprehendible to their learners. Organizations need competent CCAK certified professionals who are aware of cloud auditing terminology, risk management approaches to cloud evaluation, and audit management.
