2 Days

50404B: Overview of Active Directory Rights Management Services with Windows Server 2008 R2

Overview of Active Directory Rights Management Services with Windows Server 2008 R2 training course equips the students with the knowledge and skills to understand the role that Microsoft® Active Directory® Rights Management Services (AD RMS) plays in a wider infrastructure, and the way it interacts with other Microsoft technologies.

Objectives:

You should be able to meet the following objectives after the completion of this course:

- Creating, managing, and distributing rights policy templates as an AD RMS administrator.

- Understanding AD RMS architecture, and the role the product plays as part of a wider infrastructure.

- Understanding how Microsoft technologies use AD RMS to protect documents and email messages.

- Understanding how to use AD RMS on server applications such as Microsoft® Office SharePoint® Server and Microsoft Exchange Server.

- Understanding the AD RMS interaction model with other Microsoft technologies.

- Understanding the different trust relationships that can extend AD RMS protection beyond your infrastructure.

Course Details
