6425C: Configuring and Troubleshooting Windows Server 2008 Active Directory Domain Services

Configuring and Troubleshooting Windows Server® 2008 Active Directory® Domain Services training course gives detailed training of implementation, configuration, management and troubleshoot of Active Directory Domain Services (AD DS) in Windows Server 2008 and Windows Server 2008 R2 environments.

It also provides core AD DS concepts and functionality along with the implementation of Group Policies, performing backup and restore and monitoring and troubleshooting Active Directory related issues.

Objectives:

You should be able to meet the following objectives after the completion of this course:

- Performing secure and efficient administration of Active Directory
- Managing computer accounts
- Implementing a Group Policy infrastructure
- Managing User Desktops with Group Policy
- Improving the security of authentication in an AD DS Domain
- Configuring Domain Name System
- Administering AD DS domain controllers
- Managing sites and Active Directory Replication

Course Details

Course Outline

Module 1: Introducing Active Directory Domain Services

Module 2: Administering Active Directory Securely and Efficiently

Module 3: Managing Users and Service Accounts

Module 4: Managing Groups

Module 5: Managing Computer Accounts

Module 6: Implementing a Group Policy Infrastructure

Module 7: Managing User Desktop with Group Policy

Module 8: Managing Enterprise Security and Configuration with Group Policy Settings

Module 9: Securing Administration

Module 10: Improving the Security of Authentication in an AD DS Domain

Module 11: Configuring Domain Name System

Module 12: Administering AD DS Domain Controllers

Module 13: Managing Sites and Active Directory Replication

Module 14: Directory Service Continuity

Module 15: Managing Multiple Domains and Forests

Who Should Attend

- Active Directory Technology Specialists
- Server and Enterprise Administrators

Pre Requisite

The students should know the following, before attending this course:

- Good knowledge of Windows Client operating systems such as Windows Vista or Windows 7
- Awareness of security best practices
- Basic concepts of backup and recovery in a Windows Server environment
- Basic knowledge of server hardware
- Basic understanding of networking
- Intermediate understanding of network operating systems
- Experience in creating objects in Active Directory
