10135B: Configuring, Managing and Troubleshooting Microsoft Exchange Server 2010 Service Pack 2

Configuring, Managing and Troubleshooting Microsoft® Exchange Server 2010 Service Pack 2 will give you the skills and knowledge to manage and configure a Microsoft® Exchange Server 2010 messaging environment. It will guide you about the configuring process of Exchange Server 2010. It will also enable you to apply best practices and considerations that in turn assist you in optimizing your Exchange server deployment.

Objectives:

You should be able to meet the following objectives after the completion of this course:

- Configuring Exchange Server 2010 integration with Exchange Online.
- Installing and deploy Exchange Server 2010.
- Managing message transport.
- Managing recipient objects.
- Monitoring and maintain the messaging system.
- Planning and implement backup and restore for the server roles.

Course Details
