5 Days

10534: Planning and Designing a Microsoft Lync Server 2010 Solution

Planning and Designing a Microsoft® Lync™ Server 2010 Solution is a training course that will guide you about planning and designing a Microsoft Lync Server 2010 solution. The main focus of the course is Voice features in Lync 2010 from a deployment perspective. You will also learn to plan and design a Lync Server 2010 system. There are practical lab sessions in this training course for you to utilize the Lync Server 2010 Planning Workbook and Planning Tool.

Objectives:

You should be able to meet the following objectives after the completion of this course:

- Creating a network design for Lync Server 2010

- Designing for Location Services, monitoring and archiving

- Designing Response Group Services and voice infrastructure

- Planning a migration to Lync Server 2010

Course Details
_____

Course Outline

Module 1: Overview of the Lync Server 2010 Design Process

Module 2: Designing a Lync Server 2010 Topology

Module 3: Designing for Conferencing and External Scenarios

Module 4: Planning and Designing Load Balancing

Module 5: Designing a Mediation Server Topology

Module 6: Designing Voice Infrastructure

Module 7: Creating a Network Design for Lync Server 2010

Module 8: Designing Response Group Services

Module 9: Designing Location Services in Lync Server 2010

Module 10: Designing Exchange Server Unified Messaging Integration with Lync Server 2010

Module 11: Designing Resiliency

Module 12: Designing Backup and Disaster Recovery

Module 13: Designing Monitoring and Archiving

Who Should Attend

- Information technology (IT) professionals

Pre Requisite

Students must have experience and knowledge of –

- Core Lync Server 2010 technology

- Windows Server Active Directory deployment

Should have attended -

- Course 10533A: Configuring and Managing Microsoft Lync Server 2010

or

- Possess equivalent experience or skills
