5 Days

10324A: Implementing and Managing Microsoft Desktop Virtualization

This course will render you with the knowledge and skills to implement and manage desktop virtualization solutions. This course provides an overview of virtualization and the various Microsoft products that you can use to implement and deploy a virtualization solution.

It also describes the process of configuring and managing a MED-V deployment. Then, it would describe the procedures for deploying an App-V solution by implementing App-V servers and clients and by sequencing applications.

It covers the configuration of Remote Desktop Services and RemoteApp programs. Concludingly, this training course gives an overview of the concepts of user state virtualization and procedures for configuring the Virtual Desktop Infrastructure (VDI).

Objectives:

You should be able to meet the following objectives after the completion of this course:

- Administering the App-V infrastructure by using the App-V Management Console.

- Configuring and use Remote Desktop Services and RemoteApp programs.

- Configuring and use Virtual Desktop Infrastructure.

- Implementing Microsoft Enterprise Desktop Virtualization.

- Implementing user state virtualization.

- Sequencing applications for deployment by using the App-V infrastructure or a standalone installation.

Course Details

_____

Course Outline

Module 1: Overview of Desktop Virtualization Scenarios

Module 2: Implementing Windows Virtual PC and Windows XP Mode

Module 3: Implementing Microsoft Enterprise Desktop Virtualization

Module 4: Configuring and Deploying MED-V Images

Module 5: Managing a MED-V Deployment

Module 6: Implementing Microsoft Application Virtualization

Module 7: Planning and Deploying App-V Clients

Module 8: Managing and Administering Application Virtualization

Module 9: Sequencing Applications for Virtualization

Module 10: Configuring Remote Desktop Services and RemoteApp

Module 11: Implementing User State Virtualization

Module 12: Configuring Virtual Desktop Infrastructure

Module 13: Summary of Desktop Virtualization Technologies

Who Should Attend

- Microsoft® Windows Server® 2008 system administrators

- Desktop administrators

Pre Requisite

The students must fulfill the following prerequisites to be eligible for this course:

- Basic skills with Windows Command line

- Monitoring and Management Tools

- Networking

- AD DS, including Group Policy deployments

- Performance Monitoring

- Troubleshooting

Exams

Microsoft Certified Professional (MCP) []

464, Udyog Vihar Phase V,Gurgaon (Delhi NCR)-122016,India	+91 8882 233 777	training@mercury.co.in	www.mercurysolutions.co
