2 Days

80315A: Discrete Manufacturing Advanced in Microsoft Dynamics AX 2012

Discrete Manufacturing Advanced in Microsoft Dynamics® AX 2012 is a two-day instructor-led course that will equip you with the required resources and tools. After completion of the course, you will also be able to perform the basic tasks in the Discrete Manufacturing Advanced flow in Microsoft Dynamics AX 2012.

Objectives:

You will be able to meet the following objectives after the completion of the course:

- Analyzing actual versus estimated costs for production orders and current production activities.
- Assigning ledger settings for production groups.
- Attaching a property to a resource.
- Creating route groups and attaching them to operations on a route.
- Defining production groups to establish a relationship between production orders and ledger accounts.
- Discussing the difference between operations and job scheduling.
- Explaining how to set up and work with dimensions' groups.
- Listing the Production control module's core conceptual elements.
- Modifying data types used by the productions series.
- Reviewing calendars and resources.
- Setting the Bill of Material (BOM) scrap percentages.
- Splitting a production order.
- Using inventory reservations in production

Course Details

_____

Course Outline

- Module 1: Discrete Manufacturing Basics Review

- Module 2: Inventory Dimensions in Production

- Module 3: Subcontractor Work

- Module 4: Advanced Production Scheduling

- Module 5: Scrap and Waste

- Module 6: General Ledger and the Production

- ?Module 7: Implementing the Production Series?

Who Should Attend

- Customers?
- Production managers

Pre Requisite

The students should know the following, before attending this course:

- Ability to use Microsoft Dynamics AX 2012 for basic processing.

- Basic knowledge of manufacturing, trade and logistics, and inventory management concepts.

- Completed the Introduction to Microsoft Dynamics®AX 2012 course.

- General knowledge of Microsoft® Windows®
