

5 Days

CHFI v8 (Computer Hacking Forensic Investigator)

Computer Hacking Forensic Investigator certification course is designed to prepare security professionals to protect the organizations from the potential cyber security hazards. The program offers a storehouse of essential cyber security modules that include knowledge of computer forensics, investigation of cyber crimes, and digital evidence that provide the right aid in the prosecution of cyber criminals.

The increasing urge to attain market leadership has brought the battle on the technical realms that demands the integration of cyber security tools to secure oneself in a digitally connected world. The CHFi v8 training program will prepare the professionals to track, investigate and apprehend the prosecutors through computer investigations using groundbreaking digital forensics technologies.
