

3 Days

## El Capitan - OS X Support Essentials 10.11

El Capitan 101 OS X Support Essentials 10.11 training is a three-day course that provides relevant exposure to participants about OS X El Capitan and teaches the best ways to support OS X El Capitan users. The course also includes lectures and hands-on exercises that provide real-world experience.

This course will systematically prepare individuals for Apple Certified Support Professional (ACSP) 10.11 certification or recertification.

### For Students Enrolled in a Virtual Class:

Each participant will need to set up two (2) computers in order to take the class virtually.

1. The first can be a PC, tablet or Mac.
2. The second computer should be a Mac and you will need the software (and version) being taught in the course already installed on your computer.

This setup will allow virtual participants to view the presentation on one computer and do support exercises on the other one.

### **Completion of this training course will enable candidates in:**

- Troubleshooting the OS X El Capitan process
- Using OS X El Capitan tools and resources to troubleshoot OS X El Capitan
- Deploying OS X El Capitan features and functionality, including how to find more information about OS X El Capitan's
- Preparing for Apple Certified Support Professional (ACSP) 10.11 certification

## Course Details

---
