## Prince2 Foundation

PRINCE2 Foundation (Projects IN Controlled Environments) is a structured project management method based on experience drawn from thousands of projects and from the contributions of countless project sponsors, Project Managers, project teams, academics, trainers, and consultants.

It isolates the management aspects of project work from the specialist contributions, such as design and construction. The specialist aspects of the project can be easily integrated with the PRINCE2 method and, when used alongside, provide a secure overall framework for the project work.

Because PRINCE2 is generic and based on proven principles, organizations adopting the method can substantially improve their organizational capability and maturity across various areas such as business change, construction, IT, mergers and acquisitions, research and product development.

The PRINCE2 Foundation qualification will teach you the principles, terminology and when qualified you will be able to act as an informed member of a project management team using the PRINCE2 methodology within a project environment supporting PRINCE2

## Course Details

---

### Course Outline

- Course Introduction
- Organization
- Business case
- Risks
- Plans
- Quality
- Change

- Initiating a Project
- Directing a Project
- Managing a Stage Boundary
- Controlling a Stage
- Managing Product Delivery
- Closing a Project

- Exam Preparation Module

## Who Should Attend

Prince2 Foundation is recognized as a world-class international product and is the standard method for project management. Many companies across the world require staff to be PRINCE2 certified.

## Pre Requisite

Applicants should have some understanding of Project Management but there is no formal prerequisite for the Foundation qualification. If you need to study a generic project management course then our APM Introductory Certificate course may be of interest. After completion of the Foundation course one can prepare for PRINCE2 Practitioner course.
