20334: Core Solutions of Microsoft Skype for Business 2015

Core Solutions of Microsoft Skype for Business 2015 training provides the requisite knowledge and skills to plan, deploy, configure, and administer a Skype for Business 2015 solution. This course focuses on majorly deploying an on-premises Skype for Business, and at the same time provides information on ways to integrate an on-premises deployment with Skype for Business Online and how to migrate from previous versions of Lync Server.

During this course, candidates will also learn to deploy a multi-site and highly available Skype for Business infrastructure that supports instant messaging, conferencing, Persistent Chat, archiving, and monitoring.

This course will prepare the candidates for the Exam 70-334: Core Solutions of Microsoft Skype for Business 2015.

Course Details
