MCSA Windows Server 2012

Microsoft Windows Server 2012 Certification validate the ability of a professional to support enterprise-level management, data storage, applications and communications on a gigantic bundle of operating systems, the Windows Server. If you are looking for a training to upgrade your skills to operate on Windows Server for provisioning global cloud services into your enterprise infrastructure, you are right here.

Windows Server 2012 certification validates the individual's qualification for the role of a network of computer systems administrator or a computer network specialist.

The candidate needs to pass the following exams to earn the corresponding credential:

- Installing and Configuring Windows Server 2012 (70-410)
- Administering Windows Server 2012 (70-411)
- Configuring Advanced Windows Server 2012 Services (70-412)

Note: The MCSA: Windows Server 2012 certification requires participants to clear all three exams, namely 70410, 70411, & 70412.
