2 Days | CSF-201: Citrix ShareFile Enterprise Essentials

The two days course enables the participants to get acquainted with the knowledge of enterprise file sharing and synchronization, configuration and management of shareFile environment, implementation of StorageZones and the Windows, Control plane and data storage options, and understanding of ShareFile administrative responsibilities.

Course Objective:

The learners will be able to

- Comprehend the Enterprise File Synchronization and Sharing
- Understand the architecture of ShareFile
- Navigate the ShareFile administration interface
- Build StorageZones
- Integrate and manage ShareFile
- Deploy ShareFile clients on Windows physical and virtual desktops
- Use of ShareFile Plug-in
- Monitoring and Troubleshooting

Course Details

_____

Course Outline

Module 1: Enterprise File Synchronization and Sharing (EFSS) Overview

- Enterprise Document Sharing Use Cases
- Software as a Service (SaaS) and Cloud concepts
- EFSS Legal Basics

Module 2: Architecture

- Control Plane
- Data Storage Options
- Security

Module 3: Administration

- Manual User setup
- Folder Administration
- Advanced Preferences

Module 4: Storage Zones

- Components data flow
- Restricted Zones Overview
- CIFS and SharePoint

Module 5: User management

- ShareFile User Management (UMT) Tool and Authentication

- Security Assertion Markup Language (SAML) Overview

Module 6: Endpoint clients

- Windows and XenDesktop and XenApp Client
- Mobile Clients
- Outlook Plug-in

Module 7: User Experience

- File Management
- Preference Customization

Module 8: Troubleshooting and Management

- Authentication and Access Issues
- Component Upgrade and Monitoring

Who Should Attend

- IT Professionals interested to implement ShareFile features.
- Administrators
- Implementers
- Engineers
- Architects

Pre Requisite

- CXD-103: Citrix XenDesktop 7 Tips and Tricks
- CXD-300: Deploying App and Desktop Solutions with Citrix XenApp and XenDesktop 7.6
