4 Days

CCISO (Certified Chief Information Security Officer)

The Certified CISO (CCISO) course aim at producing superior information security executives. The CCISO certification qualifies a professional from a middle-management role to executive management roles manifesting superior knowledge on the application of information security management.

The certified chief information security officer training course recognizes real-world experiences that are based on the understanding of high-level technical topics that do not hold much relevance on technical information but are a fruitful asset to an information security executive's routine work.

To note, this program brings in the components required for C-level positions that include IS Controls, governance, audit management, human capital management, strategic program development and financial expertise to balance the information security program.
