6 Days | CXM-101: XenMobile Foundations

The XenMobile Foundations learning offering from Citrix Education provides the foundational knowledge required to embark on an Enterprise Mobility transformation project. This course provides the skills necessary to describe enterprise mobility and understand mobility management. Students with little or no Enterprise Mobility Management (EMM) knowledge or experience will gain an understanding of the architecture and components of a XenMobile Enterprise solution, their function, communication and considerations. Students will also learn how to complete an enterprise mobility needs assessment utilizing enterprise mobility management use cases and gain an understanding of the processes and considerations that lead to successful adoption of enterprise mobility.

Course Details

_____
