5 Days

Design, Deploy and Manage Enterprise Mobility with XenMobile 9.0

This course provides the skills necessary to install, configure, and integrate components in a Citrix XenMobile Enterprise solution. Professionals with little or no XenMobile experience will gain an understanding of the components of a XenMobile solution and their function.

Applicants will deploy and configure the XenMobile Enterprise solution, apply principles to enroll mobile devices, install mobile apps, and use policies to manage device and application usage in a lab environment. In addition, topics such as how to integrate additional Citrix products and applications as part of the solution and how to troubleshoot some of the most common implementation issues will be discussed.

Course Details

_____

Course Outline

Professionals will learn:

- Explain the XenMobile Enterprise end-to-end architecture and identify each component in the solution
- List the available XenMobile Editions
- Describe the function of each component within the solution
- Explain the processes involved in a successful XenMobile Enterprise solution implementation
- Perform network authentication
- Install client certificates
- Discuss the benefits of using ShareFile in a XenMobile solution
- Integrate Citrix StoreFront
- Create a basic package
- Customize a package on a device
- Create user profiles and policies
- Enroll an iPhone and Android device
- Install WorxHome, WorxMail, and WorxWeb
- Push apps to a device
- Manage enrolled devices using geo-fencing, selective wiping, blocking of unauthorized users or jail-broken devices
- Integrate PKI to authenticate certificates
- Terminate an SSL connection
- Perform an SSL Offload

Who Should Attend

This course is designed for IT professionals, systems engineers, server administrators, and Citrix Partners.
