4 Days | CAD-200 Simplifying Application Migration with Citrix AppDNA

Traditional application testing, remediation, migration and management are costly and time-consuming endeavors for enterprise IT. The objective of the Simplifying Application Migration with Citrix AppDNA 6.1 course is to teach the value of the Citrix AppDNA application migration software, how the software works and how to successfully implement it to achieve application insight and business agility.

In order to successfully complete this course, learners will have access to extensive handson lab exercises covering such topics as installation, configuration and product usage. There is also an assessment at the end that will verify customers and partners have the skills to implement Citrix AppDNA and enable Partners to be authorized to sell this product. This course is based on the Citrix AppDNA 6.1 SP 1, but the skills and fundamental concepts learned are common to earlier product versions.

Course Details

_____
