

5 Days

CXA-105 Getting Started with XenApp and XenDesktop 7.6

This five day course provides an introduction to Citrix XenApp and XenDesktop 7.6. Professionals will explore the FMA-based architecture of a XenApp and XenDesktop 7.6 implementation, install the required Citrix components, create Machine Catalogs and Delivery Groups, and test a XenApp and XenDesktop Deployment.

Course Details

Course Outline

XenApp/XenDesktop Architecture

- Identify How XenApp/XenDesktop Functions with FlexCast Management Architecture
- Difference Between XenApp and XenDesktop
- FlexCast Management Architecture (FMA)
- Benefits of FMA ! FMA Delivery Models o Identify the Components in a XenApp/XenDesktop Implementation
- Infrastructure Components
- XenApp/XenDesktop Components
- Additional Components
- How XenApp/XenDesktop Delivers Apps and Desktops

XenApp/XenDesktop Installation

- Installation Process Overview
- Licensing XenApp/XenDesktop
- Delivery Controllers
- Sites
- Installing XenApp/XenDesktop Simulation o Install StoreFront
- Understanding StoreFront Installing StoreFront
- Understanding Stores
- Creating Stores o Install Receiver
- Types of Receiver Available
- How Receiver Works
- Where to Install Receiver
- Installing Receiver Simulation

Machine Catalog and Delivery Group Creation

- Create a Machine Catalog
- Types of Machine Catalogs
- Virtual Delivery Agent (VDA)
- Machine Creation Services (MCS)
- Process for Creating a Machine Catalog
- Creating a Server OS Machine Catalog Simulation
- Creating a Desktop OS Machine Catalog Simulation o Create a Delivery Group
- Types of Delivery Groups
- Process for Creating a Delivery Group
- Creating a Delivery Group for Hosted Applications
- Creating a Delivery Group for Desktops

- Test the Environment to Ensure All Components are Functioning
- How to Test
- Testing Hosted Application Access
- Testing Desktop Access

Who Should Attend

This course is recommended for anyone interested in implementing and deploying Citrix XenApp or XenDesktop 7.6.
