## Citrix XenApp 7.5 Architecture and New Features

This course introduces the Citrix XenApp 7.5 technology. Professionals will explore the key components required in a XenApp 7.5 implementation, the new FMA-based architecture, as well as key use cases. Other topics covered include design implications, VDA registration, and Hybrid Cloud Provisioning.

### Course Details

---

#### Course Outline

##### Course Overview:

- XenApp 7.5 Overview
- New Features in XenApp 7.5
- New Terminology

##### FlexCast Management Architecture:

- Limitations of the Independent Management Architecture
- Benefits of the FlexCast Management Architecture
- Management Consoles

##### Design Implications:

- XenApp 7.5 Rollout Considerations
- Hypervisors

##### Application Enumeration:

- Virtual Delivery Agent
- Application Enumeration

##### Solution Architecture:

- Solution Components
- Solution Layers
- Solution Components
- Communication Job Aid

##### Deploying XenApp as a Cloud-Ready Solution:

- Cloud Types
- Service Delivery Models
- CloudPlatform and Amazon Web Services
- Cloud-Ready Solution Licensing Considerations Configuring Hybrid Cloud Provisioning

## Who Should Attend

This course is designed for IT professionals, architects, systems engineers, server administrators, and Citrix Partners.
