## VMware AirWatch: Install and Deploy On-Premise Solutions

VMware AirWatch Install and Deploy On-Premise Solutions is an expert course where a professional clutches the cutting-edge technology to install, monitor and integrate an on-premise AirWatch Server. Any professional who has surpassed the fundamentals of the previous courses of AirWatch server (including Configure & Manage, Configure & Deploy Integrated Solutions and Bootcamp) may opt for this certification that qualifies you as an expert in the mobile deployment activities.

This course provides an access to various tools and technologies to troubleshoot installation and up gradation issues. This certification will fetch your knowledge of deploying advanced installation techniques, and multi-server configurations that use high availability and enable redundancy.

Mercury Solutions provides hands-on-lab and upgrade strategies to provide expert knowledge of the AirWatch architecture. By receiving an expert accreditation, you will not only prove your expertise on the AirWatch infrastructure but also cater to advance solutions through installation and deployment architectures.
