80537A: Retail in Brick and Mortar Stores Installation and Configuration for Microsoft Dynamics® AX 2012 R2

Retail in Brick and Mortar Stores: Installation and Configuration for Microsoft Dynamics® AX 2012 R2 is designed to manage a retail business from the head office to the stores.

This course will guide on lessons and labs on how to install and configure the Microsoft Dynamics AX for Retail Point-of-Sale (POS) from a technical perspective along with setting up required for AX Headquarters and Commerce Data Exchange components. It will also guide you about the information on Checklists for Installation and Configuration, CDX Services and Scheduler Jobs.

Objectives:

You will be able to meet the following objectives after the completion of the course:

- Adding the SSL certificate to the Windows server
- Assigning a hardware profile to a register
- Configuring the Real-time Service in Retail Headquarters
- Disabling IPsec (no VPN)
- Distributing initial data to store database
- Finding the certificate thumbprint and common name
- Importing and assign users to the retail user profiles
- Set up a store database profile.
- Synchronizing data between the store and offline databases
