

5 Days

55037A - Sharepoint 2013 Search Inside Out

SharePoint 2013 Search Inside Out training is a five-day course that provides the right understanding in creating simple and advanced search topologies. This course will teach you how to configure the various search features like Content Sources, Result Sources, Query Suggestions and custom dictionaries.

After completing the course, candidates will be able to extend search with Business Connectivity Services and review best practices while maintaining and troubleshooting a search infrastructure.

Course Details

Course Outline
