5 Days

2400: Implementing and Managing Microsoft Exchange Server 2003

This exhaustive five-day course gives you the skills and knowledge needed to update and support the secure and reliable messaging infrastructure. The infrastructure thus updated is used to create, store, and share information for 250-5000 users by using Microsoft Exchange Server 2003.

Moreover, the course provides you with hands-on practices, assessments, and discussions to become proficient in Exchange Server 2003.

Course Objective:

On completion of the course, you will be able to

- Install, configure, secure, and manage Exchange Server 2003
- Manage recipients, public folders, and address lists
- Manage routing, client configuration, and connectivity
- Manage data storage, hardware resources, and mobile devices
- Backup, restore, and, perform preventive maintenance
- Implement and manage access to Exchange Server mailboxes
- Disaster recovery planning
- Migrate the users from Exchange Server 5.5 to 2003

Course Details

_____

Course Outline

- Module 1: Introduction to Exchange Server 2003
- Module 2: Installing Exchange Server 2003
- Module 3: Securing Exchange Server 2003
- Module 4: Managing Recipients
- Module 5: Managing Active Directory Integration
- Module 6: Managing Public Folders
- Module 7: Implementing Outlook Web Access
- Module 8: Implementing a Front-End/Back-End Exchange Server Topology
- Module 9: Managing Client Connections to Exchange Server 2003
- Module 10: Managing Message Routing
- Module 11: Managing Data Storage and Hardware Resources
- Module 12: Planning for and Recovering from Disasters
- Module 13: Performing Preventive Maintenance
- Module 14: Migrating Users from Exchange Server 5.5 to Exchange Server 2003

Who Should Attend

- IT Professionals

Pre Requisite

The participants must have prior knowledge as follows:

- Working knowledge of
  - Microsoft Windows Server 2003
  - Networking
  - Internet Protocols

- Recommended completion of courses
  - 2274, Managing a Microsoft Windows Server 2003 Environment.
  - 2275, Maintaining a Microsoft Windows Server 2003 Environment.
  - 2276, Implementing a Microsoft Windows Server 2003 Network Infrastructure: Network Hosts
